

540M LOADER

LIGHT AND VERSATILE

JOHN DEERE

This is the readily available and affordable all-you-need solution for all standard applications – the perfect match for your 6B 4-Cylinder Tractor – ready to perform any loader task with ease.

Lightweight with fast cycle times, the M Series loader features mechanical self-levelling (MSL) and offers two independent functions plus a diverter for the 3rd function.

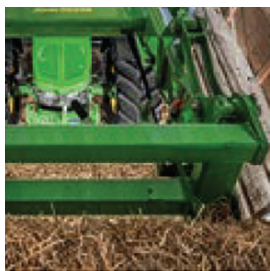

Time-Saving

Connect and disconnect the loader in less than 5 minutes and change implements with just one easily accessible lever.

Easy Maintenance

All bushings can be greased, the relevant ones can be replaced, and hydraulic hoses are protected inside the boom, with easy access to all main hydraulic parts if needed.

See It All

The design of the M Series is optimised for exceptional visibility when you connect your implements and, of course, during loader operation.

A Smoother Ride

The optional suspension provides a smoother ride for the load, tractor and operator.

Tractor /Loader Compatibility

The 540M Loader model is available for the 6095B, 6110B, 6120B and 6135B Tractors.

Lift capacity at full height: **1 720 kg**
Maximum Lift Height: **3 500 mm**
