

APEX™ Version 3.8.5.3872

Release Notes

Features:

Help Link – Apex to John Deere Operations Center User Guide Link has been updated to navigate to the Operations Center help topics.

The screenshot displays the 'Apex' to 'John Deere Operations Center' transition. It includes a description of the center as a set of online tools, followed by three main action areas: 'See' (knowing what's happening), 'Collaborate' (making decisions with others), and 'Direct' (turning plans into action). Below these is a 'What's in it for you?' section with four benefit boxes: determining yield factors, ensuring data accuracy, accurate in-season adjustments, and enabling partner services. A 'Getting started' section provides instructions on data backup and includes a red arrow pointing to the updated user guide link. At the bottom, there is a checkbox for 'Don't show this message again' and two buttons: 'Start Backup' and 'Not Now'.

Apex → **John Deere Operations Center**

John Deere Operations Center is a set of online tools that provides information about your farm when you need it, where you need it.

See
Know what's happening in your operation right now, and learn from your performance over time.

Collaborate
With the right people and tools to make decisions that save time, optimize yield and maximize profits in your operation.

Direct
Turn your plans into action, and adjust as conditions change.

The John Deere Operations Center entry level package provides tools that allow growers and their advisors to determine the effectiveness of decisions for the coming crop season.

What's in it for you?
One easy to use software application to interact with your key machine and agronomic information

- Determine which factors most influenced yield & profitability
- Ensure the data accurately reflects what actually happened in the field
- Accurate in-season executions & adjustments
- Enable partners & advisors to contribute value and provide services in a timely manner

Getting started with the John Deere Operations Center
The first step in unlocking the value of the John Deere Operations Center is to get your current data set loaded. The Apex to John Deere Operations Center User Guide walks you through the step-by-step process of completing the backup. The user guide is accessible here:

Resolved Issues:

Post Calibration – When copying data from one year to another year (2017 to 2018 for example) and sending the information to Operations Center, only half of the copied year data was shown. Post-calibrate the data to the original values and resend the data to the Operations Center.

Transfer files via Wireless Data Transfer (WDT) to the Operations Center – After attempting to “Activate Service” for WDT and saving changes, user was navigated to a blank page, so user was not able to log into John Deere Operations Center. Apex 3.8.5.3872 was updated to fix this issue, so the user will be navigated to the John Deere Operations Center login page after activating service for WDT.

Wireless data transfer is a service that will allow you to

Wireless Data Transfer allows you to wirelessly send data to machines

Transfer Files

This allows you to send setup data to machines and auto unlock
