5E SERIES 3 CYLINDER SERIES TRACTORS

055 E

5ESERES 3 CYLINDER SERIES TRACTORS

THE PERFECT FIT FOR YOUR GENERAL FARMING OPERATIONS

The ideal compact designed tractor for smaller livestock operations, production of grains, High-value crop applications and a general all-rounder on the farm to assist you with your daily operations.

BEEF & DAIRY

540/540E PTO

productivity and optimise operational cost.

throughout the operation.

TRANSMISSION OPTIONS

3 different transmission options to choose from:

- 9F/3R CS (Collar Shift) transmission,
- 9F/3R SyncShuttle[™] TSS (Top Synchro Shaft transmission)
- 12F/12R PowrReverser[™] transmission.

The **SyncShuttle**[™] transmission with pressurised lubrication of the top shaft benefits secure unsurpassed transmission reliability in any application.

The **12F/12R PowrReverser**[™] transmission offers a wider selection of speed gears, a hydraulic forward reverser and Electro Hydraulic clutch, easing direction change and complementing application at the ideal speed.

OPERATOR STATION

Increased productivity, reduced operator fatigue and greater maneuverability, are complemented by this tractor. The ergonomically designed Comfortable Operator Station includes features such as:

- adjustable seat
- hydrostatic steering wheel
- Multifunctional Instrumental Panel
- controls and instrumentation that are well positioned for easier operations.

THREE POINT HITCH

The Three Point Hitch is designed to match your implements for optimal efficiency.

An industry leading hitch load and depth control functions, allow you to adjust the hitch function based on the specific application needs increasing productivity within any operation.

SELF ADJUSTING OIL EMERGED BRAKES

The 5E 3 Cylinder tractor series comes standard with self adjusting oil emerged brakes. In comparison to disc brakes, this allows for a more responsive braking experience especially when carting a heavy load. A reliable feature that ensures a longer lifespan on your tractor's brakes.

INBOARD PLANETARY FINAL DRIVE

The heavy-duty Final Drive on the 5E tractors ensures trouble free application in severe heavy duty primary tillage applications.

Designed with onboard planetary final reduction gears ensuring **efficient power** through the rear axle to the ground. This feature permits longevity for the driveline components.

HIGH VALUE CROP

The 540 Economic PTO (Power Take Off) is the preferred choice to ensure lowest fuel consumption

The 540/540E PTO comes standard with the 5E Series tractors and allows the efficient application of PTO driven operations to benefit improved daily

This robust 2,9L John Deere PowerTech[™] engine does not only boast in power, but it was engineered in being economical as well by providing you efficient fuel consumption in daily operations.

The high-performance engine delivers a 24% torque reserve allowing ease of operation through tough spots without the need to change any gears.

GENUINE JOHN DEERE PARTS

John Deere delivers quality parts that are tailored to enhance the performance, comfort, and reliability of your tractor. Genuine tractor parts operate and function perfectly as they are created when the tractor is designed and developed. Your John Deere tractor will stay as reliable as the day it was bought for years and years to come.
